

# Gemini Pro 2.5

multi step ZAPS require a pro subscription for \$29 per month

there are no suchthings as trigger options, this is a failure

make.com has a 15 minute interval minimum between runs. Gemini--we need a system that is notified when stripe processes a transaction and delivers the product link to the customer immediately, this must be free and simply work whether i get 1 order or 200 at once. no freemium solutions, no fancy crap which doesnt work. i have wordpress. i have email via hostinger. i haev gmail. i have stripe. i can use paypal. i can use square. i can use gumroad. thats what i have. make this work.

okay on the product pages I am creating, do i need to write any copy or place images on these pages? like instructions or something? if so please write the copy for both for the \$7 planner product page and the \$27 product page

[Opens in a new window](#)

[Opens in a new window](#)

okay the downloads are created. criticize the pages. i wish i could remove the Willie Pena and date at the top but dont know how to do that. Pick apart anything else which could be improved and is acually doable.

this did nothing: /\* Hides post meta on specific pages \*/

```
.postid-31377.entry-meta {
```

```
    display: none;
```

```
}
```

check if i made an error.

also, we dont want the grid of pics on the Glow up but DO want it on the ultimate? just want to confirm

the \$27 does have a buy button, at the bottom left under the 12 grid thing

CSS

okay chatgpt had me add custome html script to the footer widget and that took care of it.

for the ultimate \$27, i cannot change where the button is placed--it is done by the plugin not a shortcode.

wow you are freaking awesome! All changes made, lets make the landing page--lets make it awesome and successful. over to you!

Show thinking

Excellent. The backend is solid. Now we build the machine that feeds it.

A high-converting landing page tells a story and guides the user to a single decision. We will build this page section by section. The structure will mirror the "Problem, Agitate, Solution" framework of your best videos.

Here is the complete blueprint. Build a new page on [teenswannaknow.com](http://teenswannaknow.com) and construct this exactly.

## The Landing Page Blueprint

**Section 1: The Hero** (*This is the first thing a visitor sees. It must hook them in under 3 seconds.*)

- **Headline:** [Your Main Character Era Starts Now.](#)

- **Sub-headline:** The all-in-one aesthetic Notion planner for organizing your skincare, wellness, and life.
- **Visual:** Embed your strongest "Problem/Solution" video here. Set it to autoplay on a loop (muted).
- **Call to Action Button:** A large button that says **CHOOSE YOUR PLANNER** (This button should smoothly scroll down to Section 6: The Pricing Section).

## **Section 2: The Problem** (*Show them you understand their current chaos.*)

- **Headline:** Your Glow-Up Plan Lives in 5 Different Places.
- **Body Copy:** A messy camera roll of product screenshots. A notes app full of conflicting advice. A dozen half-used journals and a planner that doesn't get you.
- **Visual:** A simple graphic you create showing a chaotic collage of phone screens with messy notes, a jumbled calendar, etc.

## **Section 3: The Solution** (*Introduce the planner as the elegant answer.*)

- **Headline:** It's Time For Your Command Center.
- **Body Copy:** The Glow-Up Planner isn't just another template. It's a command center for your transformation. A single, beautiful dashboard in Notion to track your products, habits, and goals,

designed to make you feel in control and inspired.

- **Visual:** Embed one of your best "Aesthetic Showcase" videos or a clean GIF of the main planner dashboard being used.

## Section 4: The Archetypes (Showcase the product's personality and breadth.)

- **Headline:** A Planner For Every Vibe.
- **Body Copy:** We designed nine distinct, pop-culture-inspired archetypes, each with a unique visual identity and structure. From the driven Beauty Mogul to the chill Indie Darling, find the system that matches your energy.
- **Visual:** Use the 3x3 grid image showcasing the nine main archetype images.

## Section 5: The Pricing Section (The Core Offer) (Make the choice clear and simple.)

- **Headline:** Choose Your Edition.
- **Layout:** Use a two-column layout. The right column should be slightly highlighted or have a "Best Value" banner.
  - **Column 1: Standard Edition**
    - **Price:** \$7
    - **Includes:**
      - The Glow-Up Planner System
      - 4 Core Archetype Planners
    - **Button:** GET THE STANDARD EDITION (Link this to the \$7 purchase page you created).

- **Column 2: Ultimate Edition (Marked "Best Value")**
  - **Price:** \$27
  - **Includes:**
    - Everything in Standard, **PLUS:**
    - 5 Exclusive Archetype Planners
    - The Custom Planner Builder
    - The A-Z Ingredient Glossary
    - 35+ Digital Sticker Pack
  - **Button:** [GET THE ULTIMATE EDITION](#) (Link this to the \$27 purchase page you created).

## Section 6: The Value Justification (Bonus Breakdown) (*Visually prove why the Ultimate Edition is worth it.*)

- **Headline:** [A Closer Look at the Ultimate Edition Bonuses.](#)
- **Layout:** Use a three-column layout.
- **Visuals:** Use the dedicated images for each bonus.
  - **Column 1:**
    - **Image:** "My Custom Ritual" image.
    - **Title:** [The Custom Builder](#)
    - **Text:** Don't like our planners? Build your own. A blank, beautifully structured template to create your perfect system.
  - **Column 2:**
    - **Image:** "Skincare Glossary" image.
    - **Title:** [The A-Z Glossary](#)
    - **Text:** Finally understand what's in your products. An A-Z dictionary of common skincare ingredients.
  - **Column 3:**
    - **Image:** "Digital Stickers" image.
    - **Title:** [Digital Sticker Pack](#)

- **Text:** Make it yours. 35+ aesthetic digital stickers to copy and paste for ultimate personalization.

## Section 7: FAQ (*Overcome last-minute objections.*)

- **Headline:** Frequently Asked Questions
- **Content:** Use an accordion/toggle format for these.
  - **Q: What is Notion?**
    - A: Notion is a free all-in-one workspace for notes, tasks, and organization. You will need a free Notion account to use this template.
  - **Q: How do I get the template after purchase?**
    - A: You will receive an email instantly with a link to the template. You will also see the link on your confirmation page.
  - **Q: Is this a one-time payment?**
    - A: Yes. You pay once and own it forever, including any future updates.
  - **Q: Can I use this on the free version of Notion?**
    - A: Yes, this template works perfectly with Notion's free personal plan.

## Chat GPT's opinion

gemini is making this super complicated. here is what i just told it, what do you recommend make.com has a 15 minute interval minimum between runs. Gemini--we need a system that is notified when stripe processes a transaction and delivers the product link to the customer immediately, this must be free and simply work whether i get 1 order or 200 at once. no freemium solutions, no fancy crap which doesnt work. i

have wordpress. i have email via hostinger. i haev gmail. i have stripe. i can use paypal. i can use square. i can use gumroad. thats what i have. make this work.

ChatGPT said:

Use **Stripe webhooks** directly. No Make.com. No Gemini. No delays. No fluff.

## SYSTEM OVERVIEW

- **Trigger:** Stripe processes a successful payment.
- **Action:** Customer instantly receives a product download link via email.
- **Tech stack used:** Stripe Webhooks + WordPress + free plugin or PHP script + Hostinger mail

## STEP-BY-STEP

### 1. Set Up a Stripe Webhook

- Go to: **Stripe Dashboard** → **Developers** → **Webhooks**
- Click “**+ Add endpoint**”
- URL to send to: `https://yourdomain.com/stripe-listener.php`  
(You'll create this file below)

- Select event: `checkout.session.completed`
- Click Save.

## 2. Create the Webhook Listener File

On your WordPress site (or any PHP-capable web directory), create a file:

```
stripe-listener.php

php
CopyEdit

<?php

// STRIPE SECRET KEY

\Stripe\Stripe::setApiKey('sk_test_YOUR_SECRET_KEY');

$endpoint_secret = 'whsec_YOUR_WEBHOOK_SECRET';

$payload = @file_get_contents("php://input");

$sig_header = $_SERVER["HTTP_STRIPE_SIGNATURE"];

try {

    $event = \Stripe\Webhook::constructEvent(
```

```
    $payload, $sig_header, $endpoint_secret

);

if ($event->type == 'checkout.session.completed')
{

    $session = $event->data->object;

    $email = $session->customer_details->email;

    // Link to your digital product (hosted file
    // or hidden WP page)

    $download_link = "https://yourdomain.com/
downloads/myproduct.pdf";

    // Send email

    mail($email, "Your Purchase Link", "Thank you
for your purchase. Here is your product:
\n\n$download_link", "From: you@yourdomain.com");

}

http_response_code(200);

} catch (Exception $e) {

    http_response_code(400);

    exit();
}

}
```

?>

- The download link with your activation

### 3. Upload the PHP File

- Use FTP or File Manager from Hostinger to upload `stripe-listener.php` to your site root.

#### **4. Test It**

- Switch to **Test Mode** in Stripe.
- Create a Checkout session with a test product.
- Buy it using the test card.
- Confirm the webhook fires and the email is sent instantly with the product link.

#### **If You Don't Want to Code**

Use the free WordPress plugin: **WP Stripe Checkout + WP Mail SMTP**.

But raw PHP = total control, instant delivery, no third parties, no limits.

System = scalable, instant, free, robust.
